

PVI00580EN\_V01

# Welding Scissors

## For endless bags and single bags

- Stationary and mobile welding systems
- Manual and automatic welding systems
- Non-Ex and Ex version according to ATEX
- Offered as welding scissors or cutting/welding scissors
- Hygienic design for sterile applications in the isolator
- Integration into existing packaging lines
- Integrated operator control for programming the process parameters
- Bags up to 900mm wide can be welded
- For welding polyethylene, aluminium composite foils, paper composite, polyamide and polypropylene

Welding Scissors mounted on swivel arm

### Function

The machine closes the filled bag, welds the bottom seam for the next bag and cuts the film between the two welds in one single operation

Closed machine during welding and cutting

Design as cutting/welding scissors (left picture) or welding scissors (right picture)
